It is no vain beast of the skinful Dentity that diseases of the Teeth are ordinarily subject to his courrol; in dead it may be regarded as settled in the public similar, that Jadous that Jadous are of course easily decomposed whitantially of lime, are of course easily decomposed by acade; and oxygen being the base of acades, we are led to two major-tant incits in the product of the month, and every thing out of the month and every thing out of the month and every thing out of the month and course have the permanent of chooks.

18t. Keep acade out of the month, and every thing out of the month and course the easily precise of the course of the month and every thing out of the month and every the easy of the purchase of the purchased.

18t. Keep acade of the month and every thing out of t

teeth suffer. These hints, if duly regarded, will lead to the following important practice:

1st. No acils will ever be used for cleansing the Teeth. All tooth powders should contain a moderate alkali.

2d. All operators on the Teeth, who use mineral pastes or fusible metals, all of which are composed of metals having strong adinity for oxygen, should be shemmed; their boasted remedies are far worse than the disease they promise to cure.

3d. All combinations of metals, such as Tin, Gold, Silver, Platina, &c., should be carefully avoided. The purest metals differ in affinity for exygen, and of course produce galvanic action when put together in the same mouth. Fine Gold is the only metal that should ever find a lodgment in the human mouth, and to this conclusion every scientific Dentist must inevitably come.

No Dentist can consistently oppose the use of an amalgam of mercury and silver, whilst he is himself in the habit—as is at present almost every Bentist in the Union—of using amalgams of Platina, Gold, Silver, Copper and Zine, under the name of "Gold Plates," Fine Gold, and Fine Gold alone for Dental operations, must soon become an axious.

And now I will only add in conclusion, for the information of an who wish to avoid the evil consequences of compound metals in the mouth, that they can be furnished with Teeth set to fine Gold Plates, namixed and unadulterated, by calling at my Room, No. 98 Broadway, New-York, the only place, (with the exception of Brockway & Sors, in Albany and Troy.) where Teeth are set to plates, without introducing into the mouth an amalgam of at least four metals, all differing materially in their affinity for oxygen.

One word to those who want entire, or nearly entire sets of Teeth, inserted on the atmospheric pressure or suction principle. My method of putting in suction Teeth, differing in some essential points from the manner usually adopted, I feel confident in saying, stands maurpas sed.

om the manner assess, assured as those requiring professional gentlemen of the profession as well as those requiring professional cryices, are invited to call and examine my method of Setting cryices, are invited to call and examine my method of Setting Creti, without the use of solder or any other base metal.

PEN MANUFACTURER TO THE QUEEN.

CAUTION.—The high character of these Pens has induced the attempt, on the part of several disreputable makers, to practice a frand, not only upon Mr. Gillott, but also upon the public. An inferior article bearing the misspelled name, thus, Gillot, omitting the final r, is now in the market. It can readily be detected by its unfinished appearance, and the very common style in which it is putup.

Observe, the genuine Pen-are all marked in full—"Joseph Gillott's Patent," or, "Joseph Gillott, warranted;" and that each gross bears a fac simile of his signature thus.
